

Universal Notebook PC Security Cable Kit

Model #DS-SNAP-IT-MXG

Dell SKU #A6877875

You can have the best security in the world, but it works only if people use it. When people have to fiddle with a hard-to-use slot lock every time they want to secure their laptop, they just don't lock it. If you can just "snap it," your laptop can be protected.

This universal security cable kit can be used on any model laptop using a compact, low-profile glue-on fastener.

This is a one-time installation and the simple fastener remains on the laptop. Once the fastener is installed, the laptop can be locked without the use of the key.

- Glue-on hub design adds strength and locking ease: the most secure combination available (compare to any slot lock cable)
- Fastener applies onto laptop in a flat area that will not obstruct any opening
- Locks your laptop in a second – just "Snap-It"
- Locks without a key
- Quality nylon pouch included
- Six foot long, vinyl covered braided steel cable with loop
- Locks can be keyed-differently or master-keyed
- Lifetime warranty
